

HPM-Non Woven Bandage Technical Data Sheet

Description:

HPM-Non Woven Bandage is the industry's leading reinforcing fabric, offering exceptional durability for a variety of waterproofing applications. The non-woven polypropylene bandage delivers excellent rupture resistance, making it perfect for applications where liquid membrane detailing is required.

Features & Benefits:

- provides excellent workability and inherent strength
- outstanding resistance to chemicals, detergents, and water
- offers protective reinforcement against movement and rot
- lightweight yet tough

Uses:

Perfect for less critical areas outside of showers, including:

- Cracks
- Joints
- Sheet Laps

Installation:

1. Measure & Cut: Determine the required bandage length and cut with scissors or a blade knife.
2. Apply Membrane & Embed: Apply a coat of our Aldridge Acrylic Membranes. While the membrane is wet, position and embed the bandage into the membrane.
3. Remove Creases: Use a flat spatula or brush to eliminate any air pockets or creases.
4. Coat Thoroughly: Apply subsequent membrane coats until the bandage is completely covered.

Notes:

Prior to application, always perform an adhesion test of all products (primers, membranes, coatings, adhesives, etc.) on a section of the prepared surface. The applicator is responsible for conducting this test and verifying substrate suitability before commencing the full application.
